Julie Carlson and Peter McCormick

Puma Darts the story so far.

For over 40 years Puma Darts have been proud to be a leading global developer producer and marketer of darts, dartboards and darting equipment. We are based in New Zealand at our own manufacturing facility. We also have manufacturing facilities in China and Taiwan we work closely with, which allows us to be a comprehensive supplier to the world dart market in both soft and steel tip darts.

Puma Darts has a goal and commitment to offer its customers a full range of innovative darts and darting equipment made to the highest standard, and supplied with service and backup second to none.

This approach has seen us as major sponsor of major tournaments around the globe. We export around the world and are always looking to develop new markets.

Our products are the choice of many of the worlds top dart players. This is reflected in our Bandit boards use in the prestigious World Cup of Darts, which Puma Darts have sponsored 1999- 2011, and the granting of official status for Puma Dart products, by national dart associations around the world.

Puma Darts was founded in 1970 by John McCormick, his knowledge has been passed onto his son Peter McCormick. Upon John's death in 2003, Peter assumed the position of Managing Director and Patron of the NZ Darts Council. Julie Carlson, John's daughter joined the business as Marketing Director at that time. Puma Darts is still family owned.

Our Location

Puma Darts factory and head office is situated in Katikati, approximately 2 hours drive South East from Auckland in the Bay of Plenty. Katikati is known as a horticultural area where its main crops are Kiwifruit and Avocados. However it is also known as the mural town – as the town features many murals portraying the stories of this area. Katikati is also growing as a niche-manufacturing hub.

Quality Manufacturing!

Puma Darts has always paid close attention to customers' needs and we have a proud record of delivering exceptional results. It is this attention to detail that has made Puma Darts products the choice of many top dart champions around the world. As well as the preferred supplier to top retailers around the world.

Being an innovation led company, we developed the now famous Bandit bristle dartboard, which we believe to be the world's finest bristle board. We have since developed our Bandit Plus board which delivers on performance and style with new features and environmental considerations. Our attention to quality has lead to our Bandit boards being officially recognised for Tournament and competition play by the World Dart Federation.

Our success has been recognised by the New Zealand Government with a Global Export Commendation Award and our manufacturing facility has obtained ISO 9000: 2000 Quality Accreditation. In the process, a unique business culture has emerged that drives our employees to perform their absolute best.

Shot!

In 2009 Puma Darts launched a new brand of darting equipment aimed at the discerning dart player - Shot! has evolved as a result of Puma Darts desire to establish a truly international brand that it can take to every corner of the globe. Derived from Puma Darts philosophy of excellence, every Shot! product has been manufactured with the care and attention you expect from master craftsmen in pursuit of excellence. All Shot! dartboards and darts are made in New Zealand and features their own designs of distinctive dart flights and packaging. Shot! is probably the fastest growing dart brand in the market today.

For latest news of Puma Darts and Shot! products visit www.pumadarts.com or www.shotdarts.com

THE BANDIT BOARD

Not all dartboards are created equally.

In 1992 we developed the original Bandit board at our factory in Katikati, New Zealand and in 2009 the Bandit Plus board. Having our own dedicated factory means we have control over the whole process and skilled board makers.

Top 10 things to look for when buying a dartboard

1. Manufacturing origin

Puma Darts and Shot! Original Bandit and Bandit Plus dartboards are made in New Zealand at our factory base in Katikati allowing our dedicated teams to have input and control over our whole process at every step.

2. Sisal

At Puma Darts we only use the finest sisal which is grown in Kenya to our own high specifications and conditioned ensuring not only the highest level of clarity in colour for high visibility but also purity for the highest strength possible.

3. Density level and depth

We manufacture our boards to an optimal density compared to a standard dartboard to allow deeper dart penetration for less bounce outs and a higher scoring potential and our boards feature over 60% bristle ensuring a deep and durable playing surface with superior healing properties.

4. Surface

At Puma Darts we sand our boards in multiple directions to give a finer playing surface which not only provides for a more

vibrant surface but also allows the bristle to heal effectively for longevity.

5. Inks

The inks we use penetrate deep into the bristle rather than just the surface like a standard dartboard ensuring with use, that the board retains its high visibility low glare colour-fast surface over time and as we only use a contact food grade eco inks it's not only good for the life of the dartboard but also for the environment.

6. Wire construction type

The Bandit range of dartboards features unique razor bladed wire construction, which is over 50% thinner than a standard dartboard, white for high visibility yet low glare and is also bladed to deflect darts into scoring areas and prevent bounce outs ensuring a higher scoring potential.

7. Bladed bulls

Bandit dartboards feature both a razor bladed micro inner and an outer bullseye to eliminate bounce outs while providing a

greater playing surface and a higher scoring potential.

8. Composite edging

The entire Bandit dartboard range feature a unique composite edging made from recycled plastics not only allowing for ease of number ring rotation but provides a modern look compared to a standard dartboard.

9. Hanging

Our specially designed wall bracket which is included with all Bandit range dartboards allows for ease of assembly and rotation without removing the dartboard.

10. Range

Our Bandit range offers the lighter and quieter Bandit Plus option featuring its composite backing and a Pro-Trainer board option which features ultra slim trebles, doubles and bulls eyes so one can hone their skills in practice.

BANDIT BOARDS

BOARDS

Made in New Zealand

Genuine Bristle dartboard incorporating Bandit Technology to virtually eliminate bounce outs and increase durability. All Bandit boards are completely staple-free.

BANDIT PLUS

THE BANDIT

Complies with WDF specifications and is the official dartboard of the World Cup 1999-2011

Backing board and fitting

BANDIT PLUS

Will deliver on performance and style. With the composite edge backing board, this gives the board a clean modern look and its mounting bracket makes the Bandit Plus easy to install. All the original qualities of The Bandit are retained for higher scoring and performance plus.

- No Staples or wire
- Made from African Sisal
- Increased Playing surface
- Bounce-outs virtually eliminated
- Full size boards - 18" x 1½"

DB 2020
94156390 2020 5

THE BANDIT

Has micro thin diamond edged blades which result in greater playing surface. These bands also serve to strengthen the board giving it better holding qualities and extending its life span. The Bandit lasts longer than traditional bristle boards.

- No Staples or wire
- Made from African Sisal
- Increased Playing surface
- Bounce-outs virtually eliminated
- Full size boards - 18" x 1½"
- Now with composite edge

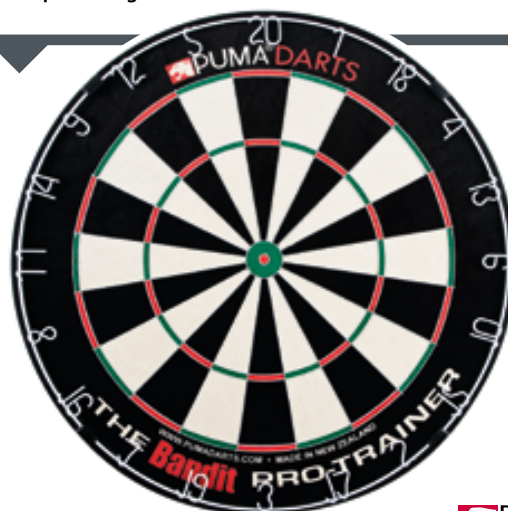

DB 2000 Patent No. 245596
94156390 2000 7

PRO-TRAINER BANDIT

The Pro-trainer Bandit is designed as a practise board for competitive players and features half sized doubles, trebles and bullseye.

- No Staples or wire
- Made from African Sisal
- Increased Playing surface
- Bounce-outs virtually eliminated
- Full size boards - 18" x 1½"
- Now with composite edge

DB 2006
94156390 2006 9

CHAMPIONSHIP BRISTLE BOARDS

Specially treated sisal for extended life and greater durability. Recessed tubular STAPLE FREE bullseye and machined 25 rings. Non fade colours for higher visibility. White number ring for high definition, reduced reflection.

PATRIOT II

Designed for home and club use whilst utilising blade wire board technology. Staple free, championship quality. Made in China.

Full size 18" x 1 1/2"

DB 2008

94156390 2008 3

BEEFEATER BRISTLE

The Beefeater board features triangular wire and 1.6mm specially crimped spring tensile wire for reduced bounce outs.

Full size 18" x 1 1/2"

DB 2001

94156390 2001 4

CLASSIC BRISTLE

The Classic board is ideally suited for home, social and practise use. Staple free bullseye.

Full size 18" x 1 1/2"

DB 2003

94156390 2003 8

DARTBOARDS

These dartboards are perfect for casual, recreational and family use.

ROYALIST

Coiled paper dartboard
Includes 6 darts, bristle
colours. Target game on reverse.
Size: 18" x 1"

DB 2203
94156390 2203 2

SOFT TIP BOARDS

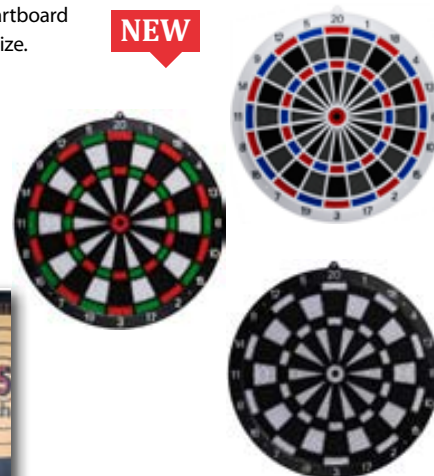

Home soft tip practice dartboard
made to official playing size.

Available in 4 colours:
Black/Green/Red
White/Blue/Red
Black/White
Yellow/Black/Red
Size: 15.5" x 1"

DB 2013

NEW

DARTBOARD ACCESSORIES

The range of dartboard accessories are designed for great player enjoyment.

DART MAT

Full sized heavy duty rubber dart mat with
throw lines clearly marked for both steel tip
and soft tip darts. Another benefit is that it
protects the floor directly in front of board
from bounce outs.

DB2306
94156390 2306 0

4 PIECE DARTBOARD SURROUND

NEW

Injection moulded high
density EVA foam protection
ring. Virtually eliminates
the risk of bounce-outs
from near misses.
Helps protect surrounding
wall area from accidental
surface marks and damage.

Easily fits around a standard
bristle dartboard, no fixings
required.

Available in black.

DB2304
94156390 2304 6

DART BOARD BRACKET

New and improved bracket. Allows
easy rotation. Made from heavy duty
plastic.

Includes 1 x bag of screws and is
very easy to install.
Eliminates the use of
silent domes!

Shirt Review

100% polyester... you can't ask for anything better than that. Many other shirts I have worn, when it gets really hot, will stick to me or seem to become tight. Puma Darts has this shirt that is the high bid of shirts allowing you to have a loose fit, comfortable throw without having your shirt stick to your skin. If you ask me, a rating 1-10, 1 being horrible and 10 being a shirt that I don't even want to take off... I give it an 11... *Terry Hayhurst*

CONTRACT MANUFACTURING

Professionalism, quality and accuracy.

With Puma Darts Contract Manufacturing and design, our team of engineers can take your design of darts and dartboards right through to fully packaged ready to ship products.

Contract Manufacturing and design is a speciality of ours ...Puma Darts has always paid close attention to customers' needs and we have a proud record of delivering excellent results. It is this attention to detail that has made Puma Darts products the choice of manufacturer for many.

We are based in NZ, at our own manufacturing facility, we also have manufacturing facilities in China and Taiwan we work closely with.

From your initial design/concept of your darts, dartboards our team of engineers and designers can take your product from the concept design stage through to fully packaged ready to ship and because we have been in the business for over 40 years we guarantee professionalism, quality and accuracy.

Our main point of difference is that we have our own plant and team of designers and engineers on site which enable us to develop product to a customer's unique requirements whether it be design, sampling, small runs etc for both darts and dartboards.

Puma Darts' modern machining process guarantees the efficient production of quality, consistent, and accurate "new generation" dart barrels of various designs in less time. Puma Darts' advanced technology and resources are an essential tool in the development and production of the GRIP-X Robson Tungsten Series.

Roberto Sencuya, President of Robson Sportscraft

WARNING

Darts is a game of skill for adults. The equipment could cause injury to children when used without proper adult supervision. Extreme caution should be exercised in the display and sale of darts equipment where children might purchase without parental approval.

SUPPLY

Puma Darts products can only be obtained from recognised retail traders who support and stock the entire Puma Darts range of darting equipment.

GUARANTEE

By the very nature of the sport of darts, it is not possible to guarantee darting equipment. The best materials and craftsmanship used in manufacture ensures top performance

and satisfaction. Naturally, any failure due to any defect in materials or workmanship will be rectified.

RANGE CHANGES

Changes in the Puma Darts range, packaging and presentation are constantly occurring and we reserve the right to discontinue, alter or substitute where appropriate.

SPECIFICATIONS

All weights, sizes, dimensions are approximate and are for guidance and comparison purposes only. The weight indicated is the approximate weight of one pointed dart body. Flights in packs may differ to those shown. Soft tip weight is the complete set weight ie tip, barrel, shaft and flight.

This product is not affiliated in any way with products from Puma-sportschuhfabriken, Rudolf Dassler KG, Germany
